

Hippy Success in School begins at home.

Quotation: If you want to build a ship with others, do not start collecting woods with them, rather awaken their longing for the big wide sea`.

We are there for Families

The duration of the Hippy program is for two years and supports parents to manage the educational development of their four to five years old children at home.

The concept is made for every two weeks in which the parents learn through acting roles, how to work with the learning materials which are brought to them by our professionally trained Trainers. After getting the parents familiar with the method, they do these activities with their children for about 15 to 20 minutes daily.

Twice in a month the parents receive the activity booklets and story books at the group meetings.

The goal or aim of the group meeting is to bring us (parents, coordinator and trainers) together to practise in a playful way. The families are also informed about important topics like matters on health, Educational reforms, child upbringing and other matters.

The special thing about our program is that it effectively complements the work of the nursery schools (kindergarten) with the aim to prepare the child for school.

Our target is to teach the children to improve their cognitive and language (communicative) skills while they are still at the preschool.

The Hippy Material

All together 60 exercise booklets for both Hippy years

18 story books; geometrical sets (Geo-set) and other additional household and natural materials

The difference is these children get parental support and also get enriched in diverse areas

1, Auditory Senses (Audio, Visual)

2, Fine motor skills and eye and hand coordination

3, Language and communication development

4,Reasoning or Imagination

5,Pre mathematical concepts

6,Creativity

Hippy Group composition 01-10-2011 to 20- 06-2013
